

Frontend Developer

Le Tuan Anh

Year of birth: 1999

Phone: 0842241999

Address: Thanh Tri, Ha Noi

Email: anhlt2204.dev@gmail.com

SUMMARY

- I have 4+ years' experiences in software development and experience in working different fields of finance domain, education domain.
- Solid foundation in JavaScript Programming.
- Strong experience in ReactJS.
- Work fully with both SQL and NoSQL databases like MySQL, MongoDB.
- Familiar with Back end - Front end communication using HTTP protocol and RESTful API Standard.
- I am willing to become a professional full stack developer.
- Hard work and high responsibility to assigned tasks. Could work overtime upon request.
- Ability to work as an individual as well as a good team worker.
- Have a logical mind with a practical approach to problem solving.
- Basic at read and writing English

TECHNICAL SKILLS

- **Programming Languages:** ReactJS, NextJS, HTML, CSS, SCSS, JavaScript, TypeScript, Flutter
- **Database Management Systems:** MySQL, MongoDB
- **IDEs:** Visual Studio Code
- **Operating Systems:** Windows
- **Foreign Languages:** English (Limited Working Proficiency)
- **Soft Skills:** Researching, Teamwork, Problem-solving
- **Version Control System:** Gitlab, GitHub, Microsoft azure
- **Library:** Ant design, Material UI, Fluent UI, Tailwindcss
- **UI Design:** Figma, Adobe XD, Photoshop, Illustrator
- **Others:** High responsibility in work, working under pressure

SOFT SKILLS

- Good interpersonal skills
- Able to work under high pressure
- Fast learner, hardworking, and flexible working.
- Self-manage work, time effectively
- Good organizational and problem-solving skills
- Can work in different roles
- Good Adaptability

EDUCATION

- **Information Security of Posts and Telecommunications Institute of Technology (2017-2022)**

WORKING EXPERIENCE HIGHLIGHTS

10/2024 – Present

FPT Software Company

Project: HR App

Developer

- **Position:** Mobile Developer
- **Team size:** 13
- **Project Description:**
 - ✓ The HR App project is an internal system developed for employee management within the bank. It includes features such as viewing employee profiles, submitting leave requests, participating in surveys, tracking working hours, and managing family-related information,
- **Responsibilities:**
 - ✓ Use Flutter to build UI/UX.
 - ✓ Implement application state management using Bloc.
 - ✓ Optimize system performance.
 - ✓ Integrate APIs.
 - ✓ Contribute to building reusable components for the system.
 - ✓ Provide solutions for issues raised by the client.
- **Technologies Used:**
 - ✓ Flutter
- **Client:** Vietnamese

11/2024 – 01/2025

Freelancer

Project: Smart monitoring

Developer

- **Position:** Frontend Developer
- **Team size:** 3
- **Project Description:**
 - ✓ The smart monitoring application allows users to view live camera feeds and record entry and exit information within the organization. It then compiles and presents the data in detailed, chart-based reports. Additionally, the system supports role-based access control, enabling different levels of access depending on user roles
- **Responsibilities:**
 - ✓ Use ReactJS, TypeScript, and the UI library provided by the client to build UI/UX

- ✓ Implement application state management using Zustand.
- ✓ Handle role-based access control.
- ✓ Optimize system performance.
- ✓ Integrate APIs.
- ✓ Contribute to building reusable components for the system.
- ✓ Provide solutions for issues raised by the client.

- **Technologies Used:**

- ✓ ReactJS, TypeScript, SCSS, Zustand

Client: Vietnamese

09/2023 – 09/2024

FPT Software Company

Project: Accounting System

Developer

- **Position:** Frontend Developer (Team lead)
- **Team size:** 16
- **Project Description:**
 - ✓ The accounting ledger management system is a cross-platform web application developed using ReactJS for the frontend and .NET for the backend. This project aims to assist businesses and organizations in efficiently and conveniently managing financial information.
- **Responsibilities:**
 - ✓ Use ReactJS, TypeScript, and the UI library provided by the client to build UI/UX.
 - ✓ Implement application state management using Redux Saga.
 - ✓ Handle role-based access control.
 - ✓ Optimize system performance.
 - ✓ Integrate APIs.
 - ✓ Use React Testing Library and Jest to write Unit Tests.
 - ✓ Use SonarQube to check syntax according to project rules.
 - ✓ Contribute to building reusable components for the system.
 - ✓ Review code of team members.
 - ✓ Provide solutions for issues raised by the client.
- **Technologies Used:**
 - ✓ Microsoft based, Web API, .NET core, SQL Procedure
 - ✓ ReactJS, Redux Saga, TypeScript, SCSS
- **Client:** Japanese

03/2022 – 08/2023

FPT Software Company

Project: Electronic Invoice System

Developer

- **Position:** Frontend Developer (Team lead)
- **Team size:** 12
- **Project Description:**
 - ✓ Electronic Invoice System is a platform service which sends and receives electronic invoices, saving, and searching to support the expected email digitization of invoices.
- **Responsibilities:**
 - ✓ Use ReactJS, TypeScript, and the Fluent UI library to build UI/UX.
 - ✓ Handle role-based access control.
 - ✓ Implement application state management using Context API.
 - ✓ Contribute to building reusable components for the system.
 - ✓ Integrate APIs.
 - ✓ Optimize system performance.
 - ✓ Handle file-related logic: PDF, CSV.
 - ✓ Analyze customer requirements.
 - ✓ Propose and document detailed implementation methods according to customer requirements.
 - ✓ Review code of team members.
 - ✓ Develop and maintain the system.
- **Technologies Used:**
 - ✓ Microsoft based, Web API, .NET core, SQL Procedure
 - ✓ ReactJS, Context API, TypeScript, SCSS
- **Client:** Japanese

12/2021 – 02/2022

A.I-SOFT Technology Joint Stock Company

Project: Kindergarten Landing Page

Developer

- **Position:** Frontend Developer
- **Team size:** 5
- **Project Description:**
 - ✓ Kindergarten landing page is an introduction page about the kindergarten system, providing information about kindergarten in the search area, educational modes in the school, ...
- **Responsibilities:**
 - ✓ Contribution to system design
 - ✓ Coding Program

- ✓ Unit Testing
- ✓ Reviewing Product
- ✓ Fix bug
- **Technologies Used:**
 - ✓ NodeJS, MongoDB
 - ✓ NextJS, JavaScript, Redux, CSS

08/2021 – 12/2021

A.I-SOFT Technology Joint Stock Company

Project: Kindergarten System

Developer

- **Position:** Frontend Developer
- **Team size:** 5
- **Project Description:**
 - ✓ The kindergarten system is an administrative system with many functions such as managing information about the kindergarten, classes in the school, scheduling classes, etc. to manage the preschools in the same system. Built on both web and mobile apps.
- **Responsibilities:**
 - ✓ Use ReactJS, TypeScript, and the Ant Design UI library to build UI/UX.
 - ✓ Handle authentication, authorization, and role-based access control.
 - ✓ Implement application state management using Redux Saga.
 - ✓ Integrate APIs.
 - ✓ Contribute to building reusable components for the system.
 - ✓ Develop and maintain the system.
- **Technologies Used:**
 - ✓ NodeJS, MongoDB
 - ✓ ReactJS, Typescript, Redux, CSS
- **Client:** Vietnamese

06/2021 – 08/2021

A.I-SOFT Technology Joint Stock Company

Project: Knowledge portal

Developer

- **Position:** Frontend Developer
- **Team size:** 5
- **Project Description:**
 - ✓ The site provides information on technology documents, as well as other relevant information.
- **Responsibilities:**
 - ✓ Use NextJS to build UI/UX.
 - ✓ Implement application state management using Context API.

- ✓ Integrate APIs.
- ✓ Integrate Firebase for real-time notifications.
- **Technologies Used:**
 - ✓ NodeJS, MongoDB
 - ✓ NextJS, JavaScript, Redux, CSS

03/2021 – 06/2021

A.I-SOFT Technology Joint Stock Company

Project: Employee Management System

Developer

- **Position:** Frontend Developer
- **Team size:** 7
- **Project Description:**
 - ✓ Attendance system is the system that manages the check-in and checkout process of employees in the company. In addition, the system also allows employees to submit leave applications, apply for late arrivals, leave early, manage employees' working days, ...
